Rev. Beverly Waugh—afterward bishop—while in the pastorate in Baltimore, 1825, was largely instrumental in the formation of the Preachers' Aid Society of Baltimore.

GAINS IN THE STOCK MARKET. Sharp Advances in Many Securities

Noted in the Dealings. New York, Feb. 18.-The stock market opened active and at many sharp advances. In American Tobacco an advance of over 10 points took place on the execution of stop loss orders for the short account The granger group scored further charp gains. The only conspicuously weak feature was Manhattan, which broke sharply on the announcement on the move on the part of the city authorities to force the company to remove its obstructions from the Battery. There were also heavy deal-ings in the Reading shares. Northern and Union Pacifics and the Atchison shares. The London market for American stocks was shown at general fractional gains.

After the opening dealings the market became somewhat irregular, but continued active, and it retained a very firm under-

Governments unchanged. The stock market closed irregular but with a firm undertone. Tobacco proved a remarkable feature. The trading in the stock reflected a practically cornered condition and it advanced by leaps until it had reached 17 1-4 per cent above the opening quotation. Nothing new wha-ever attended the remarkable advance in the stock, which seemed to be the result of wholly technical market conditions.

The balance of the list made changes which ranged to a point and over.

The Church Organized.

The Methodist Episcopal Church was organized at the Christmas conference held in Baltimore in 1784. The following sum. in Baltimore in 1784. The following summary of the work and incidents connected with this conference are given:

The conference of 1781 adopted the doctional attandands of American Methodism.

The following contributions have been three sensations of the entire week under the sensat of the standard character of the stock and the great capitalization of the road. Little-over a week ago Burlington was selling at 132. Yesterday the price was above 149. showing a gain for six market days of \$17 a share or \$14,000,000 in the value of the capital stock. Rock Island has advanced in the same time from 115 to 121 and St.

Paul from 126 to 132.

The opinions of the market critics vary as to the prospects for the future of the market. It is now evident that the public is as enthusiastic as it was in December and January, and there is, of course, the and January, and there is, of course, the possibility that much higher prices are yet to be recorded. It is realized, however, that the advances of the last few days are dangerous, as well as encouraging, to the public. It is thought, by many that the professionals may begin on Monday or Tuesday to hammer the market again to great decline, such as that of a month

Today's stock market was in nearly every respect remarkable and in some par-ticulars startling. From an opening with prices advanced materially from last night's close there was constant good buying all day and rapidly advancing prices in all the specialties that have been spicuous this week. Before the close new

The palate is almost tickled with Scott's Emulsion of Cod-liver oil. The stomach knows nothing about it, it does not trouble you there. You feel it first in the strength it brings; it shows in the color of cheek and smoothing out of wrinkles.

ens and invigorates. SCOTT & BOWNE, Chemists, New York.

ures had convinced people that they were in no way a menace, and a recovery of the slight loss occurred. The close was at very near the top figures.

The movement in Tobacco was the most sensational feature of the day. It was in fact entirely without precedent in that stock and such an advance as has very stock and such an advance as has very seldom been seen in any other. Yesterday Tobacco was 132. The high price today was 158 or an advance of 25 points. There was a recession from this top price of 2 points, but no appearance of weakness. Little is known in the Street as to the cause of the violent advance. It is sup-posed that there was a heavy short inter-est and that on the strength of the general est and that on the strength of the general market the insiders began to buy and forc-ed the shorts to cover. This price is un-precedented in Tobacco and it is not to be supposed that it will be held for long. At the same time it would be dangerous obviously to sell short at this time.

The grangers were again the features of the market with the exception of this neys, spurt in tobacco. All of them made new high records for this movement, and St. Paul and Burlington both went above the prices of January, and thus higher than they have been for ten years. Burlington did not quite touch 150, but the top price went within a fraction of the figure. talk of the refunding scheme is now taking definite shape and there seems no reason to doubt that it will be announced within a few days. One enthusiastic house says that the end of the rise for the stock will be much nester 200 than 150. St. Paul went above 132 and closed at 121 7-8 with large and excellent buying in the last few minutes of the day, which seems to make sure a good further advance for the stock on Monday. Rock Island went to 121 and closed near the top.

Reading first preferred was strong, but its advance was not great. The talk of the prospects of the road, however, is in every way reassuring.

Atchison preferred advanced slightly today, but contrary to the general expec-tation there was no attempt of the lead-ers to put it up. It is supposed that the buying was largely by the public.

Chicago Gas was one of the good stocks of the day with an advance of two points from the low of yesterday. The buying was of such a nature that it is generally believed that Mr. Flower intends to make the stock one of the features of next week. The top figure for the day was 115.

It was noticeable that many stocks were comparatively neglected. Big Four, the Federal Steel securities, Southern Railway, Central, and Southern Pacific, and many others had little or no advance for the session. The meaning of this is apparently that although the mark has broadened greatly the public was not conspicuous in the buying. The great built event that has passed, however, should induce a wider

### TRULY A SPECIFIC.

Dr. Burchmore, of Boston, Prescribes Warner's Safe Cure.

Physicians are notoriously cautious in recommending anything and they rarely use language direct and positive. Yet Dr. Burchmore, one of the leading physicians of Boston, has written the following fetter, which is numbstakable in tone. He says:

Boston, Ost 1st 1898.

"Gentlemen.—I take great pleasure in sending to you my endorsement of your excellent remedy, as there is no question regarding its remarkable therapeutic value. I speak from my experience of its use in the Suffoik Hospital and Dispensary, during my term of service. It has cured Bright's disease, diabetes insipidus, chronic interstitial nephritis, cystitis and prelitia. I have watched very carefully the results of this I have watched very carefully the results of this great remedy, Warner's Safe Cure, upon patients afflicted with any of the many discusses of the kidneys and urinary organs. From the benefit derived I feel is most assuredly a specific of great

Very truly, C. F. B. BURCHMORE, M. D. Suffolk Dispensary.

The Suffolk Dispensary is one of the most active and useful charities of Boston Dr. Burchmore has a large private practice and is a specialist in women's diseases.

The termination "itis" means inflammation. Cystitis is inflammation of the bladder. Nephritis and pyelitis are dangerous inflammatory conditions of the kid-

Physicians with their usual caution rarely use language so direct and positive as that employed by Dr. Burchmore, but they rarely have such a remedial agent as Warner's Safe Cure to talk about. Dr. Burchmore declares with that feeling of responsibility which never deserts a conscientious physician, "it has cured acute Bright's disease." He credits Warner's Safe Cure with greater power than is possessed by any other medicinal product known to man. Notice please that it calls Safe Cure a specific meaning that it has a positive effect in the cure of curtain disease. There are only a handful of specifics. Other remedies are more or less uncertain in their action. In putting Warner's Safe Cure upon the scientific roll of bonor, the eminent physician pays it a compliment which his fellow practitioners is richly merited.

Not from the observation of one case, nor of a thousand, have Dr. Burchmore's conclusions been drawn. At the Dispensary he has seen every form of kidney trouble, including all variations of Bright's disease, and he is himself a noted specialist in women's diseases. Warner's Safe Cure has stood a severe test of the general and cospondent, even if troubled with any form of female or kidney and liver diseases, when so great a remedy is within their grasp. Physicians with their usual caution rarely use language so direct and positive

IX MEMORIAM.

HARRISON—In loving remembrance of my sister, MARY ANN HARRISON, who departed this life two years ago tomorrow.

Dearest sister, two years have passed,
No more on earth we'll see thy face;
But loving hearts and willing hands
Keep green thy resting place.
Yet, again we hope to next thee,
When our day of life here has fled;
Up in heaven with locarts to greet thee,
Where no farswell tear is shed.
